# The Modern Threat

## Why Traditional Security is No Longer Enough

In 2026, the threat landscape has evolved. Ransomware attacks have increased by 30%, and hackers are now utilizing generative AI to bypass legacy systems.

### The New AI-Enhanced Threats:

- ✓ AI-Powered Phishing: Highly personalized, convincing messages.
- ✓ Identity Cloning: Deepfake voice and video used to impersonate executives (Vishing/BEC).
- ✓ Polymorphic Malware: AI-generated code that continuously modifies itself to evade detection.
- ✓ Targeted Extortion: Automated identification of sensitive data for high-pressure ransom notes.

### The Financial Reality:

The average enterprise breach now costs between \$4M and \$9M. Can your organization afford to be the next headline?

## The Z-Shield Solution

### Introducing Z-Shield: Your 360° Defense

Z-Shield is a unique product and services solution designed to comprehensively protect your enterprise's systems, networks, and data from unauthorized access and digital attacks.

## Z-Shield Core Pillars

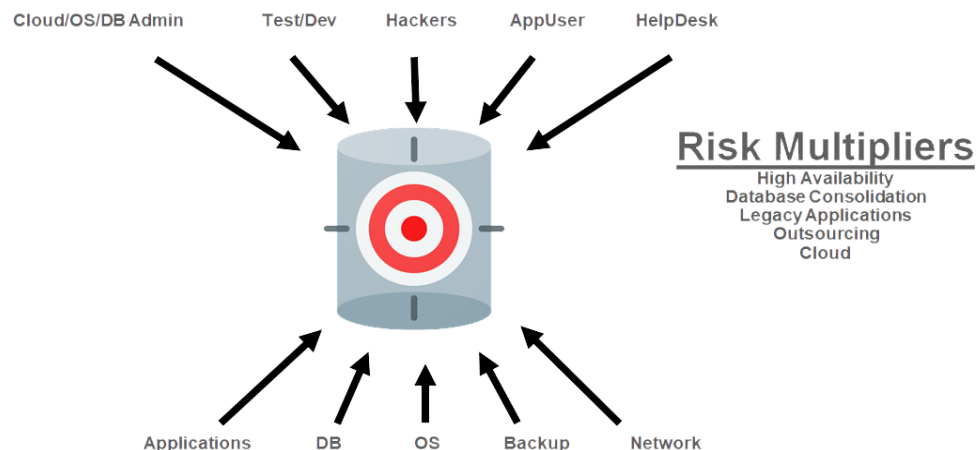

- ✓ Proven Zero-Trust Framework
- ✓ Proven End-to-End Encryption
- ✓ Zero Data Loss Appliance Integration
- ✓ Immutable Backups

## Compliance Goals

We keep you current with evolving federal mandates:

- ✓ FIPS 140-validated cryptographic modules.
- ✓ HIPAA & DFARS encryption standards.
- ✓ FISMA/NIST SP 800-53 security controls.
- ✓ Quantum-Resistant security preparation.

## Database Threat Actors, Vectors, and Targets

# The Zione Advantage

## Why Top Enterprises Trust Zione

With over 10 years of successful implementations, Zione Solutions is a service-focused IT leader helping organizations maximize ROI while reducing the Total Cost of Ownership (TCO).

## The Impact by the Numbers

- ✓ 70%+ reduction in breach risk.
- ✓ \$2.5M – \$6M in annual risk avoidance.
- ✓ \$1.8M – \$4.3M in total annual savings through tool consolidation and reduced downtime.

## A Legacy of Successes across the Industry

We are proud to serve Fortune 500 leaders and public sector giants, including:

- ✓ Banking & Finance
- ✓ Healthcare & Pharmaceuticals
- ✓ Manufacturing & Aerospace
- ✓ Government & Telecommunications

## Your Path to Resilience

Our phased approach ensures a seamless transition to a secure environment without disrupting your business logic.

- ✓ **Phase I:** Planning, Scoping, and Target Assessment.
- ✓ **Phase II:** Foundation and Design.
- ✓ **Phase III:** Transformation and Implementation.
- ✓ **Phase IV:** Validation and Operational Readiness.
- ✓ **Phase V:** Continuous Optimization.

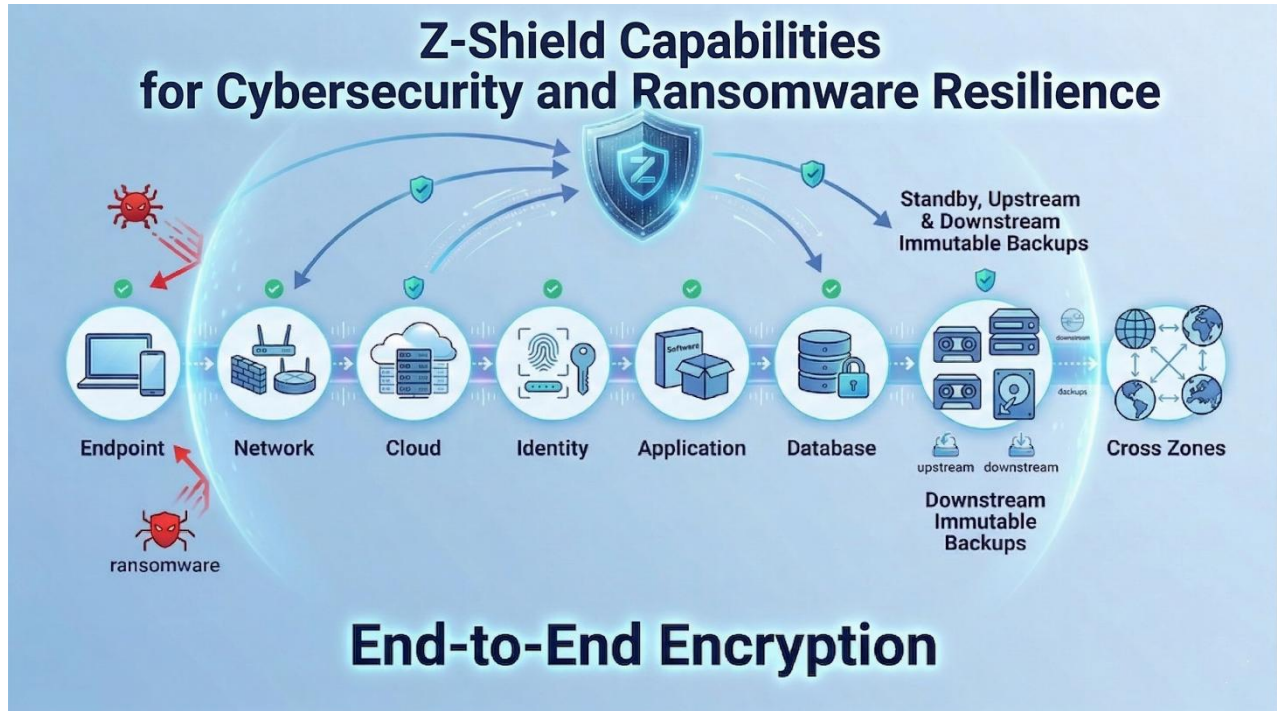

## What Does Z-Shield do?

- ✓ Provides a comprehensive cybersecurity solution defending against unauthorized access and digital attacks
- ✓ Utilizes multi-layered, end-to-end data encryption
- ✓ Enables real-time detection for threats such as malware, phishing, and ransomware
- ✓ Combines advanced technological tools with human processes to maintain data integrity

## Z-Shield Key Capabilities

- ✓ Server, Database, and Application
- ✓ Network & Infrastructure
- ✓ Endpoint Protection
- ✓ Threat Prevention

## Z-Shield Assist Defends Against AI Attacks

- ✓ **AI-Powered Defenses:** By adopting Z-Shield Zero-Trust Cybersecurity and Ransomware architecture, organizations can safeguard from artificial intelligence threats and enhance their security posture.
- ✓ **Zero-Trust & Hygiene:** Implementing Z-Shield Zero-Trust Cybersecurity and Ransomware architecture, continuous patch management.
- ✓ **Human-in-the-Loop:** To effectively manage complex and adaptive threats, it is necessary to combine AI-powered defense tools with consistent human oversight.

## Z-Shield Client Benefits

- ✓ Data recovery with zero data loss
- ✓ Compliance mandates
- ✓ Avoid financial penalties
- ✓ Protect organizations

## Ready to Secure Your Future with Z-Shield?

Transition your infrastructure into a stable, secure, and scalable environment today.
