

**Zione Solutions Oracle + Essbase
Deployment / Enablement / Optimization Service references**

General Electric - Oil & Gas: Architected a Hyperion Planning implementation. This implementation consisted of two planning applications and one **Essbase ASO** Reporting cube. Assignment included developing the design documents for all three applications.

General Electric - Health: Replaced existing **Essbase Integration Server (EIS)** and replaced using **Essbase Studio**. This included several databases that needed replacing along with existing SQL Drill Thru Reports. Some SQL had to be rewritten to work correctly in **Essbase Studio**.

Segue Technologies: Development of US Air Force **Hyperion Essbase** data mart to manage personnel and utilization metrics.

Bank of America: Developed and implemented a **Hyperion Essbase** platform migration strategy.

AMERIGROUP Corporation: Provided performance and tuning enhancements to **Essbase** solution. Presented White Paper to key executives to help make decision on strategic platform.

Citicorp: Replaced a legacy system used by the Citicorp Financial Control Division. Assisted with the design and implementation of a **Hyperion Essbase** solution for a replacement system. Assignment included development of three **Hyperion Essbase** databases including development of Calc scripts.

First Union National Bank: Designed and delivered new budgeting and planning system for First Union Finance Group. Involved in the selection process of the multi-dimensional tool, **Hyperion Essbase 3.0.2**. Developed the PROMO (Production Model) application for the **Hyperion Essbase** engine using Visual Basic, Excel w/VBA, Access, and **Hyperion Essbase API libraries**.
